DIPINGERE CON LA LUCE

La scelta di un gobo per proiettare immagini di uno show di luci è estremamente personale, ed è legata alla creatività e allo stile espressivo di ogni lighting designer. Clay Paky ha predisposto una scelta molto ampia, illustrata in questo catalogo, di gobo intercambiabili standard, sia in metallo, sia in vetro dicroico con immagini a colori, sia in vetro con immagini fotografiche e grafiche ad alta definizione, sia in vetro multicolore.

Sapendo però che non sempre tutte le domande possono trovare la risposta in un catalogo, per ampio che sia, Clay Paky mette a disposizione dei suoi clienti un servizio di personalizzazione, istituito per realizzare, su richiesta, "quel" particolare gobo che meglio risponde all'esigenza dell'utilizzatore.

PAINTING WITH THE LIGHT

The choice of a gobo for light show image projection is very personal and is linked to the creativity and expressive style of each lighting designer. Clay Paky provides a very wide choice, illustrated in this catalogue, of standard interchangeable gobos: in metal, in dichroic glass with color images, in glass with high-definition photographic and graphic images, and in multicolor glass. However, knowing full well that not all questions can be answered by a catalogue, no matter how large it is, Clay Paky is making a personalization service available to his customers, set up to create, on demand "that" special gobo that best meets the requirements of the user.

(*) In some configurations the projected image may result not complete.

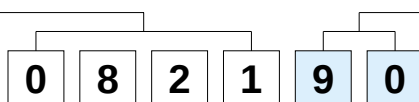

COME INDIVIDUARE IL CODICE DI UN GOBO • HOW TO IDENTIFY THE ORDER CODE FOR A GOBO

Ad ogni categoria di gobo corrisponde un numero di codice (codice base a 2-4 cifre).

Aggiungendo a questo codice base le cifre riportate sul disegno di ogni gobo si ottiene il numero di codice del gobo da ordinare.

Esempio:

CODICE BASE 0821..
BASE CODE 0821..

MODELLO DEL GOBO: 90
GOBO TYPE: 90

Codice ordinazione: 082190. Tale codice identifica il gobo metallico diametro 53,3 mm con l'immagine dei piedi, a pag. 7.

A code number (2-4 figures base code) is assigned to each gobo category, shown in the first row of the table for each category.

The complete order code can be obtained by adding to this base code the figures shown on the gobo drawing.

Example:

Order code: 082190. This code identifies the metal gobo diameter 53,3 mm, with the image of two footprints at page 7.

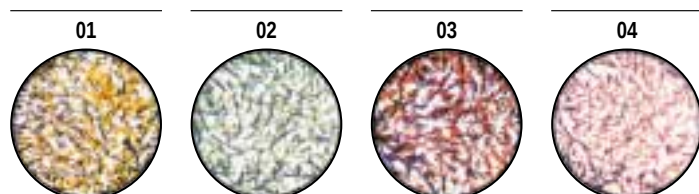

GOBO DICROICI MULTICOLORE • MULTICOLOR DICHROIC GOBOS

Diametro/Diameter	Immagine/Image	Codice base/Base code	Installabile sui seguenti prodotti/Fit on following products:

GOBO PERSONALIZZATI

Oltre ad offrire un ricchissimo catalogo di Gobo di tutti i tipi, con un'ampia varietà di materiali, disegni e dimensioni, Clay Paky mette a disposizione dei propri clienti un qualificato Servizio di realizzazione di gobo personalizzati. Specifichiamo qui di seguito la procedura da seguire per acquistare gobo personalizzati.

TIPI DI GOBO

I gobo che possono essere personalizzati sono di 3 tipi:

- 1. Gobo metallici:** le immagini bianche sono scavate nel metallo con un processo chimico o laser. Per tenere insieme il disegno o la scritta (si pensi alla parte interna della vocale "O") devono essere utilizzate piccole linee di connessione che modificano, anche se in maniera minima, la grafica originale.
- 2. Gobo dicroici:** le immagini colorate monocromatiche vengono ottenute con l'asportazione di strati colorati del filtro dicroico; le immagini a più colori sono realizzate con la sovrapposizione ed incollaggio di vetri di diverso colore.
- 3. Gobo in vetro cromato:** supporto ideale per la produzione, tramite un processo fotochimico, di gobo fotografici ad alta definizione.

COME ORDINARE UN GOBO PERSONALIZZATO

Per ordinare un gobo personalizzato è necessario trasmettere a Clay Paky:

- il tipo di gobo che si richiede, scelto fra i 3 tipi elencati in precedenza;
- le dimensioni del gobo, espresse in misure standard X-size (esempio: E-size, D-size, ecc.) oppure misura in millimetri del diametro esterno del disco;
- l'immagine o la scritta che si vuole riprodotta nel gobo.

COME INVIARE L'IMMAGINE O LA SCRITTA

Si possono inviare immagini e scritte su supporto elettronico in diversi formati oppure su supporti tradizionali su carta o pellicola.

FORMATI DEL SUPPORTO ELETTRONICO

In formato PC Windows o Macintosh.

Nel caso di gobo a uno o più colori, si consiglia di salvare l'immagine in bianco e nero e di indicare le aree che devono essere colorate ed il relativo colore tramite codici standard, quali **RAL**, **Pantone**, **Balzers**, **Lee** o altri. Se si intende procedere alla compressione dei file, si consiglia di utilizzare utilità standard quali **pkzip** / **winzip** per Windows, oppure **diskdoubler** / **stuffit** per Macintosh.

Formati Vettoriali. Questi formati sono quelli usati direttamente per la produzione, e sono quindi i più convenienti e raccomandabili: • **EPS** (Encapsulated Post Script) • **AI** (Adobe Illustrator) • **CDR** (Corel Draw) • **DWG** (Autocad) • **WMF** (Windows Meta File).

Formati "Bitmap". Questi formati saranno convertiti dal Servizio in formati vettoriali; è richiesta una dimensione minima di 10cm x 10cm, ma non eccedente la dimensioni di 20cm x 20cm, con risoluzione di almeno 600 DPI: • **BMP** (Bit MaP) • **TIFF** (Tagged Image Format File) • **GIF** (Graphics Interchange Format) • **JPEG** (Joint Photographic Experts Group) • **XBM** (X Bit Map).

Formato Testo. Riguarda ovviamente solo le scritte non disegnate. Vengono accettati i formati testo PC Windows o MAC più diffusi, accompagnati dal file del **font** (il tipo di carattere) usato.

SUPPORTI TRADIZIONALI

Immagini su carta o pellicola con una risoluzione di stampa di almeno 600 DPI e in dimensioni minime di 10cm x 10cm, ma non più grandi del formato A4. Il Servizio provvederà ad acquisire tramite scanner l'immagine e a convertirla in un file di formato vettoriale.

COME INVIARE GLI ORDINI E LE IMMAGINI

- per E-Mail all'indirizzo: displayline@claypaky.it
- per posta o per corriere: su floppy disk o su supporti tradizionali.

PERSONALIZED GOBOS

In addition to a catalogue packed with gobos of all types, sizes, materials and designs, Clay Paky also offers customers a personalized gobo production service. The procedure for ordering personalized gobos is outlined below.

GOBO TYPES

Personalized gobos can be of three basic types:

- 1. Metal:** the patterns are cut into sheet metal by a chemical etching process or laser. For obvious reasons of feasibility, these types of patterns and lettering need small "bridge" connections (central part of the letter "O" for example) which can alter the original graphic slightly.
- 2. Dichroic:** monochrome colored images are obtained by removing the colored layers from dichroic filters; multicolored images are obtained by superimposing several different color dichroic filters.
- 3. Glass with photosensitive metallic coating:** for the reproduction of high definition photographs with full grey halftones by means of a photochemical process.

HOW TO ORDER

We need the following information to produce your personalized gobo:

- type required (chosen from the three options above);
- size, expressed as standard X-size values (e.g. E-size, D-size, etc.) or the outside diameter of the disc measured in millimetres;
- the image or wording you wish to reproduce.

SENDING IN YOUR IMAGE OR WORDING

We accept images and inscriptions for personalized gobos in digital format or by means of drawings on paper or film.

PROGRAM FORMATS

Use PC Windows or Mac software.

If you wish to order a multicolor gobo, send the original image in black and white and then indicate the areas you wish to color together with the color required using standard color codes such as **RAL**, **Pantone**, **Balzers**, **Lee** etc.. If you do use file compression software, adopt **pkzip** / **winzip** for Windows or **diskdoubler** / **stuffit** for Macintosh.

Vector Formats. These are the formats we use for the production of personalized gobos and will therefore reduce costs and should be used wherever possible: • **EPS** (Encapsulated Post Script) • **AI** (Adobe Illustrator) • **CDR** (Corel Draw) • **DWG** (Autocad) • **WMF** (Windows Meta File).

Bitmap files. Bitmap files will be converted by the personalized gobo service into vector formats. Images must be between 10cm x 10cm (min) and 20cm x 20cm (max) with at least 600 DPI resolution: • **BMP** (Bit MaP) • **TIFF** (Tagged Image Format File) • **GIF** (Graphics Interchange Format) • **JPEG** (Joint Photographic Experts Group) • **XBM** (X Bit Map).

Text formats. When you send the wording you required on the gobo use a common PC Windows or MAC text editor. Make sure you also send the file containing the **fonts** you wish to use.

PAPER OR FILM ORIGINALS

Images can also be sent in on paper or film with resolution of at least 600 DPI and minimum size of 10cm x 10cm. Please keep the image as large as possible but not larger than A4 paper size. Clay Paky's personalized gobo service will capture the image using a scanner and convert it into a vector format file.

WHERE TO SEND ORDERS AND IMAGE/TEXT INFORMATION

- by Email to: displayline@claypaky.it
- by post or courier: on diskette, paper or film.
